In a Community that is worried about development and growth. This development is a blight on that idea.

Cell towers bring property values down a discourage people from wanting to live in Communities homing them.

This development offers nothing to Our Community. Offers no jobs. no children for our school, no support to our infrastructure (water + Sewer).

RECEIVED
10/4/16
MAC

The only thing this offers is a ugly line of sight obstruction for the entire valley.

Please think of the pro + cons of this development when making your decission.

I personally can't see any pros for the City of New Meadows or its resident

Thank you for your consideration
