Re: ITD Review Comments – Brown’s Business and Brown’s Mountain Recycling

Dear Mr. Qualls:

The Idaho Transportation Department (ITD) has reviewed the design review of the new commercial building proposed at 400 North Norris Street in New Meadows. ITD has the following comments:

- 1) ITD has no issues with the proposed development. US Highway 95 has sufficient capacity to accommodate the anticipated traffic volumes. There have been no reported accidents adjacent to the project site during the last three years.
- 2) Any new or revised approach will require a permit from the Idaho Transportation Department. ITD prefers to eliminate all access to US 95.
- 3) If an approach is permitted, ITD’s access management policy requires approaches on US 95 at a minimum 250-ft interval within the City of New Meadows (measured from the center of one approach to the center of the other approach).
- 4) ITD has comprehensive rules governing outdoor advertising on the state highway system. The applicants should contact ITD (208.334,8343) for information on signage adjacent to the right-of-way if any new signing is planned.

You or staff can contact ITD directly if you have any questions. My direct phone is 208.334.8377.

Sincerely,

A handwritten signature in blue ink that reads "Dave Szplett".
