Addressed to the Mayor & The City Council of New Meadows:

Following is a withdrawal of our previous good wishes toward Bill Brown's endeavors on Property Block 84, lots 10-18. We are absolutely opposed to the approval of design review & conditional use permit. It is with disappointment over lack of integrity and ethical issues toward even the simplest first step-requests such as: A CONCEPTUAL DRAWING, that we must withdraw our support of Bill Brown's proposals regarding the aforesaid property.

We have increasing concerns on every issue that has been raised starting at the beginning with fulfilling the EPA regulations for the site.

The lack of a conceptual plan and drawings; apparent ethical deficiencies and transgressions; ignorance and willful or intentional violations of regulations: permit processes, licensing, laws regarding mining, vehicle sales, etc., are serious matters.

No survey was conducted of the site before excavation began. There is an actual infringement by Mr. Brown on the McClain Street right of way and there was an attempted infringement on the alley way between our property and the mining site.

These are just some of our concerns but we stand firmly on these to recommend that the council deny all of Mr. Brown's incomplete proposals.

This letter would be 3-4 pages long if we listed everything. So, we will restate the beginning issues with the mining property site and the EPA to the latest letter read at the last meeting. This letter contains a seeming congenial and helpful offer to the city to remove rock from the property for their roads and serves as the latest attempt at clouding the actual issue. Mr. Brown has already removed rock from the City's property. Dianne Green, the same official Mr. Brown has quoted, had also said the rock may possibly have to be put back.

We are not in favor of Storage Units as a replacement of a fence. There needs to be a fence around the storage units for obvious reason.

Wes and Dixie Jeffs
