RE: New Meadows DMR / Permit # ID0023159

Our lab advised us that our testing indicated the discharge of Phosphorus outside of our permit levels for June 2017.

Because we stopped discharging the first day of summer (June 20, 2017), we believe the discharge limit of Phosphorus is skewed as we only had 19 days of discharge instead of 30.

We request if a violation be issued, the violation be considered a "soft" violation if required.

We have begun construction on our new Land Application site adjacent to our sewer lagoon system. This will help eliminate violations of this type when completed.

Thank you,

Anthony J Koberstein, Mayor
